Project Executable Files

Date	14 July 2026
Team ID	xxxxxx
Project Name	AgroSense AI – Intelligent Crop Recommendation System
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

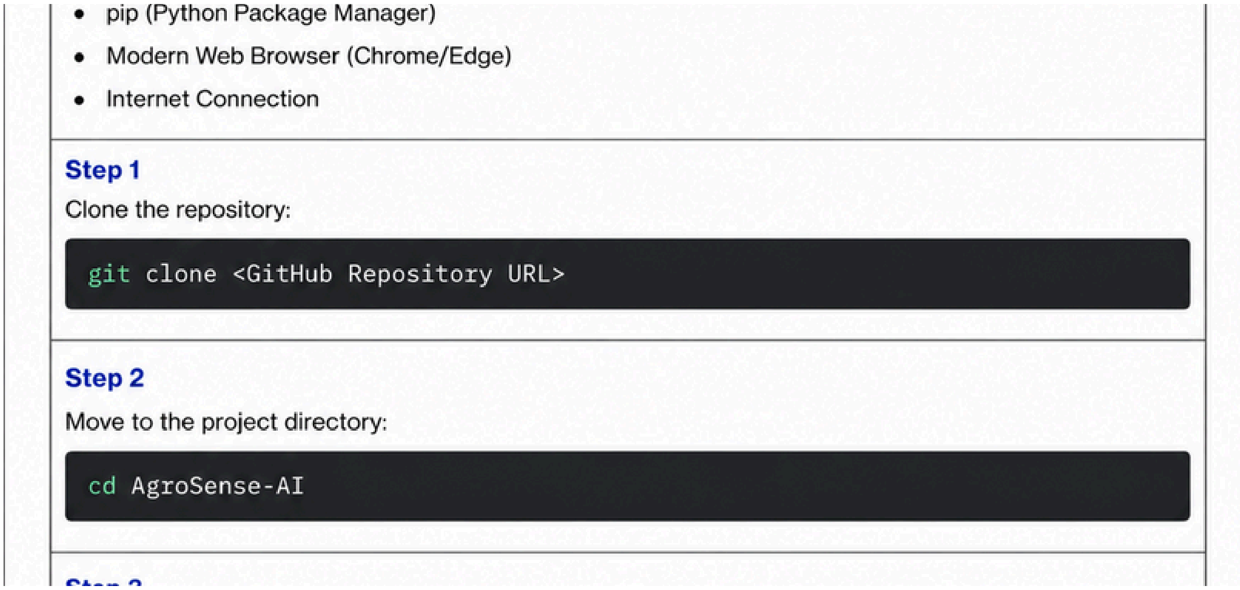
```
AgroSense-AI/
│
├── app.py
├── model.pkl
├── requirements.txt
├── README.md
├── .env.example
│
├── templates/
│   ├── index.html
│   └── result.html
│
├── static/
│   ├── css/
│   ├── js/
│   └── images/
│
├── dataset/
│   └── Crop_recommendation.csv
│
├── models/
│   └── trained_model.pkl
│
├── utils/
│   └── prediction.py
│
└── screenshots/
    └── output_images
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://crop-reco.vercel.app/
Login Credentials (Demo)	[Providedemo username and password for evaluator access]
Platform / Hosting Provider	Vercel (Frontend) + Flask Backend
Repository Link	https://github.com/VigneshVudatha/crop_reco.git
Demo Video Link	https://drive.google.com/file/d/1WlBvvk-pUIFAs8zPy05ynzUaqceLuQUu/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:



- pip (Python Package Manager)
- Modern Web Browser (Chrome/Edge)
- Internet Connection

Step 1

Clone the repository:

```
git clone <GitHub Repository URL>
```

Step 2

Move to the project directory:

```
cd AgroSense-AI
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality of user input.	Users should enter valid soil and environmental values.
2	Internet connection is required for the hosted version.	Run locally using the provided source code if offline.
3	Supports only the crops available in the trained dataset.	Future versions will include more crops and updated datasets
