

Solution Architecture

Date	13 July 2026
Team ID	XXXXXX
Project Name	AgroSense AI – Intelligent Crop Recommendation System
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>[Presentation Layer]</i>	<i>Provides the user interface where users enter soil parameters (N, P, K, Temperature, Humidity, pH, Rainfall) and view the recommended crop.</i>	<i>HTML5, CSS3, JavaScript</i>
<i>[API Gateway]</i>	<i>Receives HTTP requests, validates user input, invokes the machine learning model, and returns prediction results to the client.</i>	<i>Python, Flask</i>
<i>[Microservices]</i>	<i>Processes input data, loads the trained machine learning model, and predicts the most suitable crop.</i>	<i>Scikit-learn, NumPy, Pandas, Joblib</i>
<i>[Database]</i>	<i>Stores the crop recommendation dataset and the trained machine learning model used for prediction.</i>	<i>CSV Dataset, Trained .pkl Model</i>
