

No. of Functional Features Included in the Solution

Date	14 July 2026
Team ID	XXXXXX
Project Name	AgroSense AI – Intelligent Crop Recommendation System
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Input Module	Allows users to enter Nitrogen, Phosphorus, Potassium, Temperature, Humidity, pH, and Rainfall values.	Frontend (HTML/CSS/JS)	Done	High
2	Input Validation	Validates user inputs before sending them for prediction.	Flask Backend	Done	High
3	Crop Recommendation Engine	Uses the trained machine learning model to predict the most suitable crop.	ML Model (Scikit-learn)	Done	High
4	Result Display	Displays the recommended crop on the web interface.	Flask Templates	Done	medium
5	Responsive User Interface	Provides a simple and responsive interface for desktop and mobile users.	Frontend	Done	medium
6	Dataset Processing	Uses the crop recommendation dataset for prediction.	Pandas / CSV Dataset	Done	medium
7	Model Loading	Loads the trained machine learning model at runtime for predictions.	Joblib / Scikit-learn	Done	High
8	Deployment	Hosts the application online for public access.	Vercel	Done	High

Joblib / Scikit-learn

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	4

Additional / Nice-to-Have Features	
Features Tested & Verified	

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)		
2	Backend / Logic		
3	Database / Storage		
4	API / Integration		
5	Security / Authentication
